

# Business Advisory Services

*Subsurface Consultants & Associates, LLC*

## Consulting in key business areas:

- Targeting impact on company performance and bottom-line delivery.
- Combining extensive hands-on experience and direct access to high-quality technical experts and training.
- Led by high-profile oil & gas executives, managers, and leaders.
- Tried and tested in a broad range of majors, mid-size and independent companies in the US, UK, and Europe in line with SCA's "Excellence That Runs Deep" principle.
- Bringing multicultural viewpoints and insights.
- Leveraging SCA's long track record of effective technical consulting.

Strategy	Organizational Efficiency	Transformation	Asset Value Optimization	Non-Operator Influence
<p>Navigating volatile context to improve performance in specific areas of the business.</p> <p>Our experts have led and been involved in strategic design, implementation, and delivery of targets.</p>	<p>Flexible and adaptable organizations can effectively perform at varying capacities while keeping clear accountability.</p> <p>Skill gap evaluation, training and access to experts underpin the design of these types or organizations.</p>	<p>Needing to address the engagement of the workforce is a continuous process.</p> <p>Hands-on experience through mergers, organizational changes and crisis management.</p>	<p>A "must" in the current environment, as much from the economic point of view, as from the carbon footprint standpoint.</p> <p>Our experience covers a variety of asset types and operating environments.</p>	<p>Get the most out of your investment and ensure ESG is in line with company requirements.</p> <p>Specific tactics applied to focus the influence and provide unique value to the operator.</p>

## Meet Dr. Amalia Olivera Riley

Our Business Advisory Services are led by Amalia. She is an executive leader with 30 years of experience in the oil and gas industry.

### Executive Experience

Amalia's experience in leadership and executive level positions spans across a large spectrum of companies from super-majors to small independents including ExxonMobil, Repsol, and Tullow Oil. She has a wide breadth of professional focus, geographic experience, company scales and cultures, and business environments.

### Strengths

Amalia's strengths include her strategic vision, technical and organizational leadership, and transformation. She has a track record of generating positive impact on individuals and organizations alike. Her experience across the globe includes projects worked on five continents covering 40+ countries in deep water, onshore, and unconventional environments.

### Industry Leadership

Amalia was on the World Energy Council 2020 list of Influential Women in Energy. She is an active industry forum participant in areas of Technology, Inspirational Leadership, Energy Outlook, Future of Exploration, and Women in Energy. She is also an experienced board member and chairwoman including the IAPG Houston (2010-2013) and Lean In Equity and Sustainability (2022).

### Personal

Amalia has a PhD in Geoscience from Purdue University, Indiana, USA, and has worked and lived in Houston, USA; London, UK; and Madrid, Spain. She grew up in Argentina, and is fully bilingual in Spanish and English

### SCA's Credentials

**50+** countries supplied with our global consulting and training services.

**200+** clients served including IOCs, NOCs, large and small independent E&P companies, startups, private equity-backed organizations, investment banks, oilfield services companies and legal firms.

**700+** projects completed successfully.

**27,000+** geoscientists and engineers trained worldwide.

## Serving the Upstream Industry Since 1988
